Message

from the
Chairman
Board of Trustees
DIU

I would like to extend my heartiest congratulation to all the present alumni from Dept. of Textile Engineering for being a part of this 2nd DIU Textile Alumni Reunion, 2015. Surely this reunion program will enable all the alumni to share their experience in own sector for mutual benefit and achievement.

DIU is always determined to provide the cutting edge knowledge to its students to make them an asset for this country and to take the lead in their sector by providing unparallel capabilities and qualification. To meet the challenge Dept. of Textile engineering, from its birth provides both highly educated faculty members and Lab facilities. The result is our confident alumni.

In present days Textile sector is the lifeblood of our countries economy and our Textile Alumni members are widely involved in nearly every textile industries in different key positions. As alumni of this prestigious institution it is your duty to keep a strong tie among yourselves, with the current students and to DIU so that networking continues.

I wish every success of this 2nd Textile Engineering Reunion program and to all the alumni members of TE, DIU.

Md. Sabur Khan

MESSAGE

Message

from the
Vice Chancellor

MESSAGE

I am delighted to know that for the second time Department of Textile Engineering is going to arrange a reunion for its alumni. I believe that this event will bring all the alumni of this department under one umbrella where forgotten relations will be revived and lost connections will be reformed and many new relations will be created.

An alumni member is considered to be an ambassador of her/his institution to the job market as well as to the world. As an employee of an organization, a graduate not only fulfills professional requirements but also represents her/his university, its quality and standard. Many graduates move to foreign countries to achieve higher education where their excellence shape up the fame of their Alma Mater. Alumni association makes the bridge between the graduates and the current students for mutual benefits. The alumni can act as a strong platform for the fresh graduates in job fields in the country and abroad.

I wish that the alumni of Department of Textile Engineering will maintain a strong contact with the current students and provide them proper supports when they move to the job sector or higher studies. Also the alumni will keep a close contact with the university and make themselves a part in its developments in the years to come.

I must thank the persons who are behind this huge program. I wish the second reunion of Textile Engineering Alumni a grand success.

Professor Dr. M. Lutfar Rahman

Message

from the
Pro Vice Chancellor

I am very pleased and feel privileged to extend my congratulations and felicitations to my colleagues and students on the occasion of reunion of Department of Textile Engineering, Daffodil International University, on May 1st, 2015.

Since 2005 the Department of Textile Engineering, Daffodil International University has prepared generations of engineers, addressed challenges in the textile sector in Bangladesh and world as well. They proved that great things happen here. I wish to express my appreciation to our faculty and staff for their continued outstanding work on behalf of the University and its students since they have been reminding us to look beyond the horizon to consider the potential of our institutions and to imagine greater possibilities. I mention this to remind you that this success and commitment to excellence have always been part of this Department and our graduates are everywhere you look and I am very proud of them.

I am delighted to see this tradition of celebration in such a huge manner. It is an opportunity to recognize the Department's past while also building tradition and looking ahead, I hope everyone who will be attending, will have a wonderful time hearing and sharing stories about the early days of the Departments, learning about how much has changed and looking in anticipation to the future.

I pray that the Department will continue to flourish and grow and I wish resounding success to this event and a memorable time to all the participants.

A handwritten signature in black ink, appearing to read 'Golam Rahman'.

Professor Dr. Md. Golam Rahman

Message

from the
Emeritus Professor

MESSAGE

I am very pleased to know that the Department of Textile Engineering, though established in the year 2005, is going to organize a "Reunion" of its alumni for the second time and also publish a Souvenir commemorating the great occasion.

An alumnus (masculine, plural alumni) or alumna (feminine, plural alumnae) is a former student of a department, School, college or University. An alumni association is a conglomeration of graduates or more broadly former students (alumni). In the United Kingdom and the United States, alumni of Universities, Colleges and Schools often form groups with alumni of the same organization. Those associations organize social events, publish newsletters or magazines and raise funds for the organization. Many provide a variety of benefits and services that help alumni maintain connections to their educational institution and among fellow graduates.

Likewise, DIU Textile Engineering Alumni Association founded on 28th March, 2014, has been upholding the image of the University especially the Department of Textile Engineering. It has been organizing seminars, mutual deliberation and other social functions off and on.

In the United States, the endowment is often an integral to the financial health of private educational institution. Often alumni of the institution will contribute the bulk of the capital to the endowment. The total endowment can be over one billion dollars in many leading Universities. As an example, Harvard University (number one in world ranking) has the largest endowment in the United States with close to 26 billion assets as of June 30, 2009. Members of the DIU Textile Engineering Alumni Association, I hope, will be inspired by the contribution of Harvard alumni to their alma-mater.

The demand for Quality Assurance has become a major concern in higher education today. It depends largely on the quality of curricula where alumni can contribute constantly through their experiences in the practical field.

Finally, I congratulate all the members of DIU Textile Engineering Alumni Association for organizing the important event of "Reunion" and also I wish the function a great success. I pray to Almighty for the progress and prosperity of the Association in future.

A handwritten signature in black ink, appearing to read 'a-Is Lam'.

Aminul Islam

Message

from the
Dean,
Faculty of Engineering

I am glad to learn that, the alumni of Department of Textile Engineering, Daffodil International University are going to observe their first reunion on coming May 22, 2015 at the permanent campus of DIU in Ashulia.

Reunion is a process of reinvigoration of symbiotic relationship between former students. It also gives the opportunity to rejoin them to the existing students in an institution. Excellence, benefits and solutions are the integral parts of this incident. I am hopeful about the success of this grand occasion.

I sincerely admire the splendid preparation for this remarkable event. I firmly believe that these types of efforts will inspire and add a tremendous momentum to the teachers and students of our engineering faculty in carrying out relevant professional progress.

Finally, I wish the grand success of this massive episode.

Professor Dr. M. Shamsul Alam

MESSAGE

Today I take the immense pleasure to say you 'welcome back'! Reunions are a valued tradition at our department and an excellent opportunity to reconnect with your classmates and friends. We are pleased to host the second reunion of the students of Department of Textile Engineering, Daffodil International University since the classes of 2005.

The department of Textile Engineering has gone through many exciting changes since those years, and will undoubtedly go through many more in the years to come as we adapt to the new challenges facing our textile industry, our environment and global demand. However, if there's one constant that has endured through the past ten years, it is the community and camaraderie of the alumni from this department.

Each day at TE, we strive for excellence, and to achieve it, we know that we must innovate relentlessly. In the classroom, our faculty members — renowned for teaching excellence — deliver a powerful, transformational experience for both graduate and undergraduate students. They also boldly pursue new knowledge, achieving excellence in research. They leverage the thought of leadership in the student's personal and professional life which ultimately give birth to successful teachers, researchers, entrepreneurs, industrialists and many more.

I heartily thank you today who have made this sentimental journey, many of you have come from long distances which is phenomenal and will speak reams about the TE experience. It reflects how small the world is for a TE graduate, how much friendship and community matter to you, how proud you are of as TE graduate. Celebrating a reunion on permanent campus provides an occasion to welcome you back and thank you for all that you do for your department.

I would like to recognize Reunion Committee volunteers for their hard work in planning and promoting the program. I thank those of you who have so thoughtfully expressed your concern and support.

I very much look forward to welcoming you back in the near future and convey warm wishes for a wonderful journey waiting ahead.

Prof. Dr. S.M. Mahbub Ul Haque Majumder

Message

from the
Head,
Department of Textile
Engineering

It is great to think that the alumni of TE, DIU are going to organize Reunion on 15 May 2015. The alumni have to remain very busy in their job so that they do not get time meet together. Thanks our alumni Tanvir Ahmed Chowdhury, Sr. Lecturer, Dept. of TE and Md. Mominur Rahman, Sr. Lecturer, Dept. of TE for their hard work to make the event success. It is also highly appreciable to think that attempts have been made to publish a reunion Souvenir that will contain the photographs and addresses of the alumni. I know it was a very hard work to organize all these activities in a short period of time; however this will have some permanent impact in maintaining relationship among everybody concerned.

In recent years all the concerned quarters tried their best to make sufficient textile graduates in the country. Both public and private was equally in the race. As a consequence a large number of graduates are being graduated every semester though the job market is not increasing too much. I expect that our graduates will be careful about it and will prepare them to face challenge with courage. Link among graduates will help them to spare and share knowledge among them. It is also highly admirable that an online blog will also activate in the eve of this reunion. I hope the graduates will be very careful will follow the rules of blog in submitting posts in the blog. At the moment we have great lacking in the area of educating experts having knowledge of technicians, fitters, supervisors etc. In the industry everybody have the role to play. A graduate or diploma engineer does not perform the job of a fitter or mechanic. We do not have any formal institute to train this category of people though our industries demand a lot of them on continuous basis. Therefore I would suggest our graduates to be more concerned about the technical matters and to learn them more extensively. This will help them to guide and prepare existing people more efficiently. Apart from this they can play role in educating and developing more experts in their own factories.

Finally I extend my sincere gratitude to authority of DIU for helping the reunion activity in many ways. I also appreciate textile club for actively participating in the event.

Prof. Dr. Md. Mahbubul Haque

MESSAGE

We Together through

Daffodil International University

Textile Club (DIUTC)

Background of DIUTC:

Daffodil International University Textile Club (DIUTC) is playing imperative roles in Textile Engineering Department of Daffodil International University from its foundation on 19th September 2012 after getting prior approval of the constitution by Prof. Dr. M. Luffar Rahman, honorable vice chancellor of the University. From then this club is being controlled by the approved committee in where honorable Head, Department of Textile Engineering is acting as the Convener. DIUTC has already passed more than two years with accomplishing numerous activities and is considered as landmark in communications among the students of the Department. This club is committed to form a strong linkage between the textile graduates and current students of the Department to facilitate industrial training and job scopes. Now-a-days, most of the co-curriculum and social activities are being successfully conducted by DIUTC.

Members of Present DIUTC Committee:

Prof. Dr. Engr. Mahbubul Haque (Convener, DIUTC)

Mr. Mohammad Abdullah Al Mamun, Assistant Professor (Treasurer, DIUTC)

Mr. Sumon Mazumder, Assistant Professor (Advisory member, DIUTC)

Mst. Murshida Khatun, Lecturer (Advisory member, DIUTC)

Senior Executive Member: Ahsan Habib Saurav Chowdhury (19th Batch)

Executive Members: 1. Sazzad Ahmed (20th Batch)

2. Mùhaiminul Islam (23th Batch)

And 11 Junior Executive Members

Activities of DIUTC:

Following activities have been conducted by DIUTC up to now-

- a) Organizing 1st and 2nd re-union programs to develop better communication among the alumni and existing students of the Department.
- b) Semester wise orientation programs for the new students of Textile Engineering, so that the newcomers avail the opportunity to know about the departmental activities and their teachers.
- c) Organizing seminars and workshops frequently by involving skilled personnel from the textile industries and research institutes so that the students can learn about advanced technology and career guidelines.
- d) Arranging mill visits for the students through communication with the industry people.
- e) Decoration of classrooms and laboratories of Textile Engineering Department to create excellent vicinity for the students.
- f) Aiding poor students and donation of money to family of deceased students by raising funds from the club.
- g) Conduction of various types of activities such as debates, sports, social works and so on.
- h) Development of unique website for the club and blog for speed up the communication among the textile engineering graduates and current students of the department.
- i) Collection of blood groups from the faculty members and students, and development of a database so that the donors can instantly supply blood during emergency requirements.

Achievement through DIUTC:

- i) Textile Engineering Department obtained several awards from the University for Project Presentation in DIU foundation day.
- ii) Students of DIUTC obtained several awards for winning in interuniversity tournaments such as cricket, football, volleyball, basket ball and so on.

Your Social Responsibility to Textile-Clothing (T/C) Industries

You, as Textile Engineers, are primary stakeholders of textile and clothing sector. Core competence in technical knowledge and skills is basic requirements for an industrial Textile Engineer. But only core technical knowledge is not enough to lead a life of successful Engineer, but also requires sincere applied knowledge on your industrial social responsibility, which might be well known as Corporate Social Responsibility (CSR).

Social responsibility is not any new concept, but widely used since early 1970. The collapse of "Rana Plaza" exactly two-year ago, which killed more than 1135 garment workers, has compelled us to rethink and do our social responsibility. Several international codes of conduct and/or standards have come into being such as "Alliance for Bangladesh Worker Safety" and "Accord on Fire and Building Safety" after collapse of Rana Plaza. Some international standards and codes of conduct brought significant changes to its requirements.

Social responsibility is must for every organization, and even for every individual. Social responsibility is an ethical framework activity to society at large. The most important elements of a society are people and environment. Doing betterment to people and environment through organization can be simply referred as "social responsibility". Corporate Social Responsibility (CSR) is used as interchange of "Social Responsibility (SR).

Social responsibility concept is understood and explained by different people in different ways. Labor intensive industries, such as clothing manufacturing industry, stand on firm believe on doing betterment to only to workers as only social responsibility, while capital intensive industries focus on environmental well being as social responsibility. Some international standards and codes of conduct focus (such as SA8000, BSCI, ETI, FLA-Fair trade) on doing betterment to workers as the core social responsibility while some on environmental betterment (ISO 14001). Some organizations do "donation" or "charity" as activity social responsibility where as others criticize the charity or donation by saying that give a man fish and you feed him for a day, teach a man to fish and you feed him for a lifetime.

Textile-Clothing (T/C) industries are very important organizations for the mankind. T/C industries provide the second most basic need of mankind. Due to economical independence, the basic need has turned into lavish need. To fulfill this lavish need, the T/C industries had undergone radical changes and had to adopt different techniques, tools, methods, etc., and had to use materials and chemicals that are unsustainable for the ecosystem.

World Commission on Environment and Development in 1987 first popularized the term "sustainable development". Since then, the social responsibility as the key concept in implementing sustainable development got momentum in the industrial and service sectors. Sustainable development caters the needs of present without compromising the ability of future generations to meet their own. Sustainable development focuses on three dimensions, such as economic development, social justice, and protection of environment.

ISO (International Organization for Standardization), the largest organization for setting standards globally, has come up with complete guidance on interpretation and implementation of Social Responsibility as ISO 26000. This guidance document has integrated all the possible principles, core activities, framework and processes of social responsibility, which can be used by any organization.

Some of you might have good knowledge on social responsibilities and some of you might have been practicing social responsibilities as your primary roles in the organization, but rest of you might have query on how to know details on social responsibilities. The answer is very simple; investigate the key terms used in this article.

Md. Abrar Ahmed Apu

Assistant Professor
Department of Textile Engineering
Faculty of Engineering
Daffodil International University

Prospective Carrier for the Future Textile Engineers

Bangladesh is one of the best Ready Made Garments (RMG) exporter in the world. According to the McKinsey report (2011) its position is after China (first in position exporting RMG). Bangladesh's garment exports during July-June 2012-13 period climbed by about 12.7 percent. In that year the export earning was US\$ 21.515 billion which was US\$ 19.089 billion during period of 2011-12. Bangladesh mainly exports RMGs in Europe, USA, Canada and some other countries of the world. The major RMGs are knit and woven wears. This sector accounts for about 81% of the total export earning of the country.

Due to the current situation in this sector, textile education has become one of the common interests of subject in the country among the students. There are many educational institutes which have been providing different degrees on textiles including M.Sc. in Textile Engineering, more recently Bangladesh University of Textiles (BUTex) is going to start PhD program in textile engineering. There are about 21 private universities and 8 public universities/college in the country which are providing graduates in textile arena. Among them Daffodil International University has started M.Sc program prior to BUTex and the authorities of the university are intended to start PhD program too. The universities provide textile engineering degree in four major areas of textiles namely yarn manufacturing, fabric manufacturing, wet processing and apparel manufacturing.

There are about 350 spinning mills in the country. About 80% of the yarn needed by the knitting and weaving factories are supplied by these spinning mills. On the other hand, thousand of apparel industries produce garments from dyed and/or printed fabrics. The four major sectors (yarn manufacturing, fabric manufacturing, wet processing and apparel manufacturing) are jointly manufacturing RMGs. Traditionally, the students passing from different textile institute getting job in the textile industries. But they are not only doing job in their respective major areas but also other major areas. For instance, a student, passing from fabric manufacturing major area, is starting his/her job as a merchandiser in apparel industries due the current job availability in the textile sector. Many passed out graduates are recruited where they get higher initial salary.

For these reason, some sector like spinning, fabric manufacturing are not getting fresh graduates which can hamper the factories in future. More over some sectors like wet processing and apparel manufacturing are getting saturated for the fresh graduate. Job vacancies are less in these fields. On the other side, in spinning mill or fabric mill there are more vacancies and they do not find good graduates. This scenario of the job in textile field may make imbalance on overall textile sector.

Recently, the students passing from the universities choose apparel merchandising as their first choice. So day by day the competition of getting job in this field is getting harder in the country. The phenomenon was same in dyeing sector in earlier and it become very harder to get a good job for the fresh graduates. In these circumstances, it is very easy to get a good job in spinning or weaving mills.

So, the job prospect or opportunities to get a job in the spinning or weaving mill will flourish in future which also make balance in the job filed of textile sector.
